

# 1921 Reduction of Energy Distribution Losses (5th Phase, 2nd bid)

- The purpose of the project is to reduce energy losses in two scopes. The first one refers to non-technical losses associated to the lack or unreliable measurement readings on the energy consumption. The second one is associated with the reduction of technical losses caused by lack of maintenance and modernization of the distribution networks.
- This phase will be carried out in the northern region, benefiting the States of Coahuila, Chihuahua and Durango.

## Project Details:

- The project includes three works of measurement assurance and 6,030 AMI (Advanced Metering Infrastructure) type meters with communication via PLC (Power Line Carrier). The project is located in the States of Coahuila, Chihuahua and Durango.
- The estimated project implementation period is 12 months.

## Geographic location

States of Coahuila, Chihuahua and Durango.
