

La Laguna – Aguascalientes Gas Pipeline

- La Laguna – Aguascalientes gas pipeline will supply natural gas to the CFE’s power generation plants located in the States of Durango, Zacatecas and Aguascalientes, as well as the Central and Western regions of the country.
- This project will be interconnected to El Encino – La Laguna gas pipeline, currently under construction, and Villa de Reyes – Aguascalientes – Guadalajara gas pipeline, which is about to start its bidding process. This system will supply natural gas to new power generation plants, as well as those currently operating with fuel oil, which will be converted to use natural gas as their base fuel.
- Transparencia Mexicana will overview the bidding process in order to comply the highest standards of transparency.

Project Details:

- The project comprises the engineering, procurement, acquisition of real estate rights, permits and governmental approvals, funding, construction, operation and maintenance of a pipeline with capacity of 1,189 million standard cubic feet per day (MMSCFD). The pipeline will have a length of 600 kilometers (km) and a 42-inch diameter.
- The estimated project implementation time is 22 months.
