

Ojinaga – El Encino Gas Pipeline

- Ojinaga – El Encino pipeline will transport natural gas from Waha, Texas to Mexico. It will supply natural gas to CFE's power generation plants in Chihuahua, as well as the North, West and Center regions.
- This project will be interconnected to El Encino –Topolobampo and to El Encino – La Laguna pipelines, both currently under construction. This system will supply natural gas to new power generation plants, as well as those currently operating with fuel oil which will be converted to use natural gas as their base fuel.
- Transparencia Mexicana overviewed the bidding process in order to comply the highest standards of transparency.

Project Details:

- The project comprises the design, engineering, procurement, construction, operation and maintenance of a pipeline with capacity of 1,350 million cubic feet per day (MMCFD). The pipeline will have 205 kilometers long and a 42-inch diameter.
- The estimated project implementation time is 28 months.

Geographic Location:

State of Chihuahua
