

# Villa de Reyes Gas Pipeline Branch

- This branch will supply the thermoelectric Villa de Reyes power plant as well as the San Luis Potosí I and San Luis Potosí II combined cycle power plants that are scheduled to start their commercial operations in April 2020 and June 2024, respectively.
- Initially, it will interconnect with the Ramones Phase II system, and subsequently interconnect with the Aguascalientes - Villa de Reyes - Tula gas pipeline that is scheduled to begin commercial operations in June 2017.

## Project Details:

- The project includes the design, engineering, supply, construction, operation and maintenance of the gas pipeline.
- It will have approximately 19 km long and 24-inch diameter. It will transport up to 276 million cubic feet per day (MCFD) to the plants located in Villa de Reyes, San Luis Potosí.
- The estimated project implementation period is 12 months.

## Geographic location State of San Luis Potosí
