

Sureste II and III Wind Power Plant

- According to CFE's growth forecast, energy demand in the Eastern region of Mexico will increase an average of 3.8% annually from 2014 to 2028.
- In order to meet this demand, while maintaining regional reserve margins at appropriate levels, this wind power plant will be built in Ixtepec, Oaxaca.
- This project comprises two modules with total capacity of 585 +/- 2% MW, which will generate electricity from wind's energy. It will be bidden under a Turnkey scheme.
- The Ministry of Public Administration will appoint a social witness for this public bid.

Detalle del Proyecto:

- It consists of the design, programming, construction and commissioning of this wind power plant.
- This project will reduce CO2 emissions to the atmosphere. It will have an estimated factor of 0,764 ton CO2/MWh.
- The estimated project implementation time is 20 months.

Geographic Location: State of Oaxaca.

Relevant Facts:

Estimated Investment: **1,079 million** U.S. dollars

Capacity:	585 +/- 2% MW
